## Mission

New York Oncology Hematology Brain Tumor Support Group's mission is to provide a setting where individuals and loved ones impacted by brain tumors can come together as a group, discuss challenges, learn from others, and support each other in coping with diagnosis, treatment and life changes. The support group's objective is to promote awareness of the complex needs of brain tumor patients and their caregivers, raise money for research and new treatments, and support others in need.

Receiving a brain tumor diagnosis is frightening and living with a brain tumor has unique challenges. You are not alone with your feelings and experiences. New York Oncology Hematology and Dr. Susan Weaver developed a support group that meets once a month. Here, you are welcome to come and meet others who are facing similar challenges.

Join us the first Monday\* of every month, 5:30-7:00 p.m., via Zoom.

The group is an open forum. You are welcome to bring topics for discussion, articles, resources, questions, etc., to share. We also welcome you to share items that are appropriate and relevant to the Brain Tumor Support Group.

*\*If the first Monday is a holiday, the group will be held on the second Monday of that month.*

## Support Group Information

### WHO SHOULD ATTEND

If you are an adult diagnosed with a brain tumor or have a family member, friend or you are a caregiver for someone with a brain tumor, we welcome you to attend. The group is open each month to new members, and no appointment is necessary.

### LOCATION

Due to COVID-19, this support group will meet virtually via Zoom. To register and get access to the log in credentials, please contact the support group facilitator, Anne Grenchus (contact information on the back).
